

PAVAN DONGARE

Full-Stack Engineer (React, TypeScript, Node.js, Supabase, AI Systems)

dongare.pavan25@gmail.com · +91 9049481501 · pavandongare.com · github.com/PavanDongare

PROFESSIONAL SUMMARY

- 7+ years building full-stack systems for compliance, data platforms, and regulatory environments (banking + B2B SaaS)
- Hands-on tech lead designing architecture, building core systems, and leading engineering teams
- Shipped 0-to-1 products end-to-end across architecture, backend, and frontend in both enterprise and independent client work
- Strong in React, TypeScript, Node.js, Python, SQL, AWS, and AI-integrated applications

SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Python, React, Next.js, Node.js, Express, Django, React Native
- **Data & Infrastructure:** SQL, Supabase (PostgreSQL), Firebase, AWS, Vercel, Redis, REST APIs, CI/CD, Git, Jenkins
- **AI & Systems:** OpenAI APIs, AI-integrated applications, PyTorch, scikit-learn, NumPy
- **Domain Tools:** Metadata-driven systems, OneTrust, GDPR workflows, compliance automation

WORK EXPERIENCE

Leucine, AI for Pharma

Sep 2025 – Jan 2026

Tech Lead – Metadata Platform

- Led end-to-end development of metadata-driven platform for pharma compliance
- Designed EAV/JSONB architecture enabling configuration-driven application generation
- Built core backend services (Supabase) and dynamic schema, API, and UI generation
- Implemented multi-tenant compliance rule engine reducing onboarding time from weeks to hours
- Led a team of 5 engineers, owning core system architecture and technical direction

Unilever via Neem Consulting and Publicis Sapient

Feb 2024 – Sep 2025

Tech Lead – Compliance Automation (OneTrust)

- Built automation scripts and monitoring systems for large-scale compliance workflows
- Designed real-time scanning and rule enforcement pipelines across 1000+ websites
- Reduced manual workload for a 10-member operations team through automation
- Scaled compliance coverage from 10% to 96% across global web properties
- Implemented backend services and integrations using Next.js and Express

Vahak, Epictus Solutions Pvt Ltd

Mar 2022 – Feb 2023

Technical Product Manager, Platform

- Led frontend migration from React to Next.js for B2B transport marketplace
- Implemented authentication, API integration, and performance optimizations
- Migrated infrastructure from AWS to Vercel improving deployment speed and reliability
- Impact: DAU increased 10x, conversion rate 4x, organic traffic 2x

Morgan Stanley

Aug 2018 – Mar 2021

Senior Software Engineer

- Migrated AngularJS codebases to TypeScript and modern frontend architecture
- Built shared UI component library adopted by 250+ developers
- Developed enterprise regulatory reporting applications
- Built the frontend wizard journey for the pre-IPO stock distribution platform used by employees claiming IPO shares, including flows that supported Uber and Pinterest IPOs

INDEPENDENT CONSULTING

Mar 2021 – Present

- **DreamCare (Maharashtra Police):** Built and maintain workflow applications and websites supporting police department operations
- **EdTech & IoT:** Architected and shipped full-stack web applications for product teams in EdTech and IoT, owning frontend, backend, and integration layers
- **Masai School:** Industry mentor for full-stack development, guiding students through real-world project work

EDUCATION

Masters in Computer Science Engineering (Applied AI Research)

NIT Tiruchirappalli

2018 · CGPA: 8.8/10

Data Structures, Algorithms, Machine Learning, Computer Vision; implemented ML models and published two IEEE papers
